

# Ephraim BAH

Software Developer | Frontend & Backend | Open-source  
Enthusiast

## Summary

I am software developer with experience building web and mobile applications, contributing to open-source projects, and delivering full-stack solutions with a strong eye for UI/UX

## Experience

### Open-source Developer

RasenganJS | July 2024 – Present

Contributing to the development and improvement of RasenganJS, a modern React framework.

### Software Development Intern

Kouete Digital Solution | August 2024 – August 2025

Worked extensively on the company's web solutions, primarily focused on healthcare and consulting platforms used by large clients such as Evia in Germany. Contributed to feature development, system integration, testing, and maintenance to improve reliability and user experience across multiple applications.

### Software Developer

Heekoo | April 2025 – November 2025

Lead the development of core platform features from the ground up, handling architecture, backend services, real-time components, and integrations.

### IT Trainer

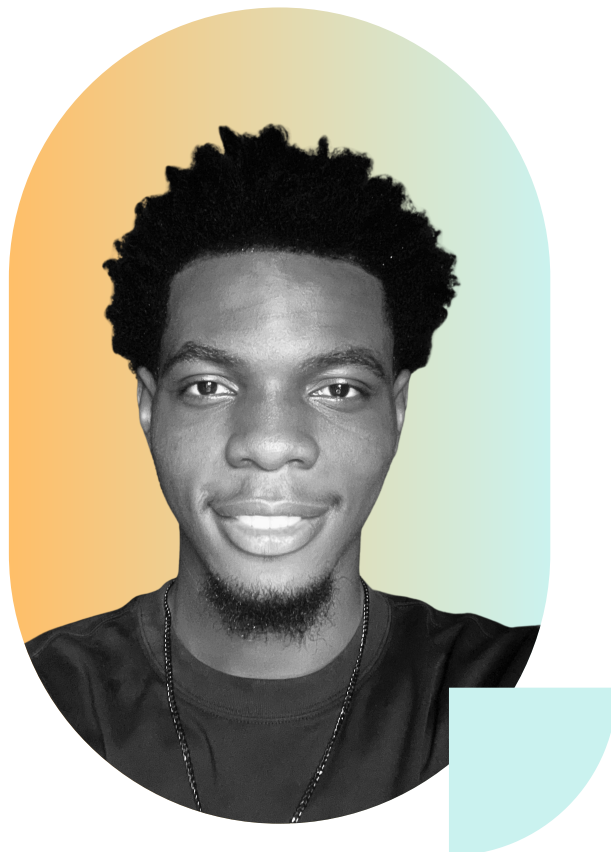

GTIC | July 2023 – August 2023

Delivered introductory programming and IT literacy courses.

### Trainee Developer

Skysoft Technology | March 2018 – August 2021

Assisted in software development projects, learning full-stack application development.
